

THE ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 10

Fall 1980

Number 4

CONTENTS

Global properties of spaces of AR's By LAURENCE BOXER	665
Partition of topological spaces into zero-dimensional subsets By L.S. GRINBLAT AND T. NISHIURA	671
Periodic, nonperiodic and irregular motions in a Hamiltonian system By PHILIP HOLMES	679
Functional topologies on Abelian groups By D. BOYER AND A. MADER	695
Characterizations of some generalized countably compact spaces as images of M -spaces By KENNETH C. ABERNETHY	709
Countability properties of function spaces By R.A. MCCOY	717
Completeness of relative holomorphs of Abelian groups By JAMES R. CLAY	731
Banach spaces which are nearly uniformly convex By R. HUFF	743
Oscillation theory for generalized second-order differential equations By DON B. HINTON AND ROGER T. LEWIS	751
Local propagator theory By STANLEY STEINBERG	767
On absolutely Euler-Knopp and De La Vallée-Poussin summability By J. BUSTOZ	799
Order convergence in lattices By MARCEL ERNÉ AND SIBYLLE WECK	805
Index to Volume 10	819
